FSC Highlights

1. Led by membership-based non-governmental organizations.
2. Democratic governance – 3 balanced chambers
3. Prohibits deforestation.
4. Requires growth meet or exceed harvest.
5. Protects old growth and HCVF
6. Restricts highly hazardous pesticides.

7. Protects indigenous peoples' rights.

8. Requires stakeholder consultation

FSC-certified claims are always tied to certified inputs

Allows certification claims only when associated with certified virgin inputs or independently verified post-consumer waste.

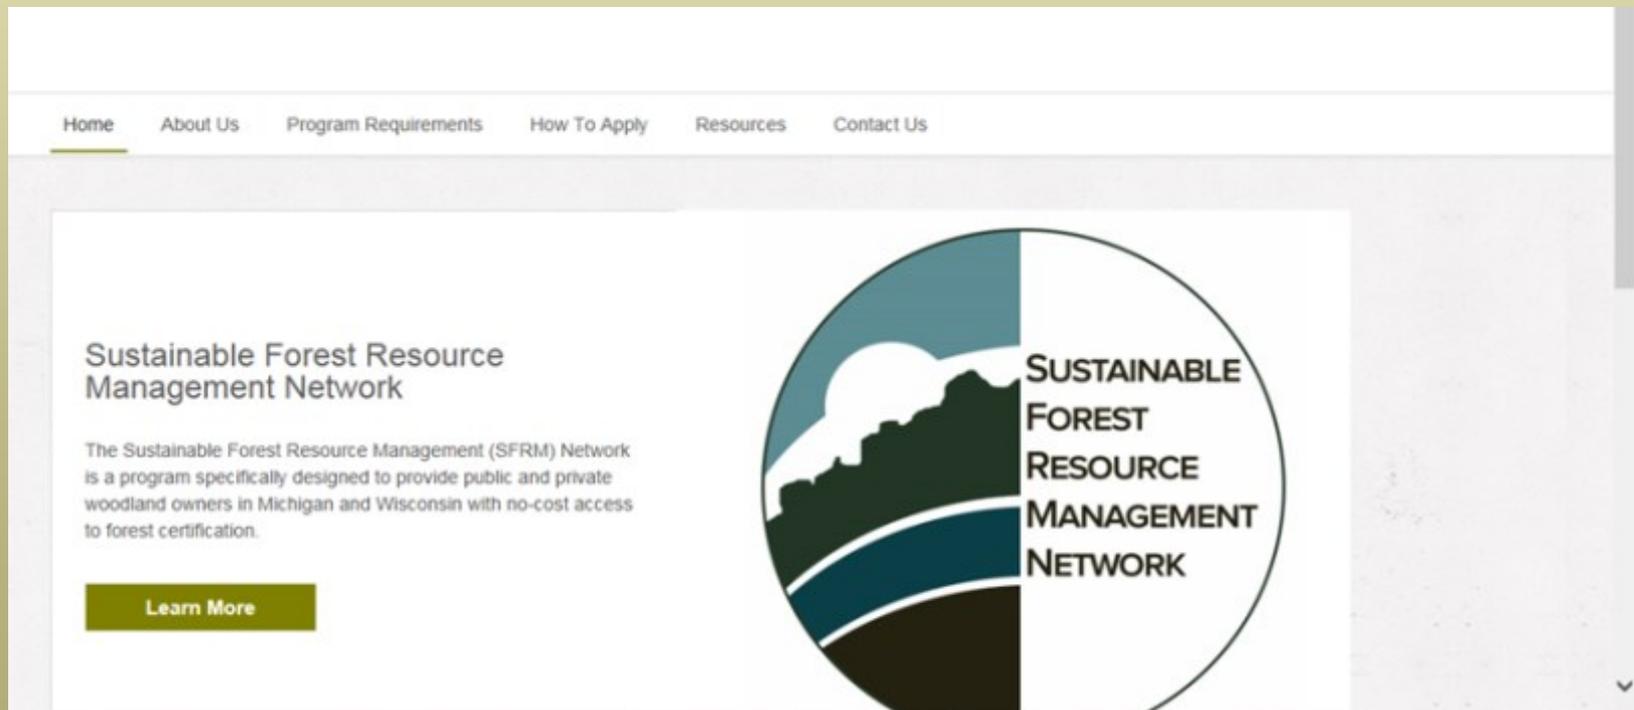

Other certification allow labeling regardless of whether the producer has received any certified inputs.

**Nature Conservancy Group Certificate: 9 members, 7 states, 350,000 acres
Staff both on North America and International Board. Our forestry company is a voting member in the Economic Chamber.**

Forest Planning - USFS - FSC

Draft Criteria are out for Comment

Join us for an interactive webinar on the
draft Supplemental FSC Certification
Requirements for National Forests

The first public consultation of the
supplemental requirements for
FSC certification of lands
managed by the US Forest Service
closes on April 22. See the [FSC US
Federal Lands webpage](#) for more
information.
